

Public Forum: Newest Advances in Nanotechnology

Tuesday, September 11, 2007, from 7-9pm

Come join us for an enjoyable adult experience at the Museum of Life and Science!

On Tuesday, September 11, 2007, from 7-9pm, Dr. Richard Superfine from the Department of Physics and Astronomy at UNC–Chapel Hill will be speaking about the newest advances in nanotechnology from his lab and around the world. This program is a new discussion-based minds-on program at the Museum of Life and Science, where members of the public are engaged in dialogue and deliberation around the societal and ethical implications of nanoscale science, engineering and technology. Our forums provide participants the opportunity to participate in a compelling adult experience that goes beyond the traditional lecture and Q&A format. Please join us to broaden your knowledge and awareness and to engage in meaningful conversations with new people and area scientists.

Pre-registration is required.

Please email forum@ncmls.org or contact Brad Herring at 220-5429 x360 to register. Doors open at 6:30pm
